

Staff Scheduler

One live schedule for your whole team — who is where, doing what, every slot of every day.

A live, shared staff schedule that replaces the spreadsheet: one column per staff member, one row per time slot, with drag-and-drop reassignment, one-off day overrides that never break the standing weekly pattern, and unassigned work flagged in red the day it happens. Every change saves automatically to the VIBE server and is recorded in a change log — the whole team always sees the same, current version.

KEY FEATURES

- ✓ **Master timetable** — the whole team, one day, one grid; drag any entry between columns to reassign it on the spot
- ✓ **Schedule gaps, visible** — work with nobody assigned shows in red on the day it happens, with one-click assignment and a weekly coverage summary
- ✓ **Auto-save + change log** — changes save to the VIBE server within seconds and are attributed to the person who made them
- ✓ **CSV import/export** — bring your staff list and schedule in from a spreadsheet, and your data is never locked in
- ✓ **Template + day overrides** — a recurring weekly pattern for the normal week, one-off overrides for a single date that leave the pattern intact
- ✓ **Scope-safe editing** — every change asks “just this date, or every future week?” so a one-off swap never becomes the new roster
- ✓ **Print-ready PDF exports** — master timetable (A4/A3, auto-tiled) and one-page individual rosters for each staff member
- ✓ **School Edition included** — purpose-built mode for Education Assistant timetabling: student support allocation, term dates, and Tier 1/2/3 program rosters
