A proper incident register — logging, investigating and reporting, without the paperwork.

A per-business incident register for recording, investigating and reporting workplace health and safety incidents — physical and psychological — alongside the photos, reports and case notes each one generates. Staff can report a hazard or near-miss without an admin login, and every incident follows a clear status workflow through to close-out.

KEY FEATURES

- ✓ **No-login staff reporting** — public QR/URL form for incidents, hazards or near-misses, with an anonymous option for sensitive reports
- ✓ **Status workflow** — Open, Investigating, Action Pending, Closed — with a mandatory note at every change
- ✓ **Append-only case notes** — a tamper-evident timeline per incident, with authenticated file uploads
- ✓ **Board-ready reports** — filtered PDF and CSV reporting by type, category, area and severity
- ✓ **Full incident register** — date, type, area, department, severity, witnesses, first aid and treatment, all in one record
- ✓ **Notifiable-incident helper** — flags incidents reportable to the regulator within 24 hours, with a reminder banner
- ✓ **Tiered access** — psychological and mental-health records restricted to full admins only
- ✓ **5-year retention** — incidents archived, not deleted, in line with WHS Act 2011 record-keeping requirements
